

Exchange Data International

Since 1994, Exchange Data International (EDI) has been helping the global financial community make informed decisions with high quality securities reference data, corporate actions, end of day pricing services and we have now added economic data.

The cornerstone of its success lies in its expertise in integrating, aggregating and flexibly delivering structured data to facilitate investment research, administration and processing as well as its ability to fit its clients' operational requirements.

EDI's flexible redistribution policies have made EDI a key player in the financial and economic data space. In addition, there is no requirement to expunge the data should you decide to cancel.

Free trials available for all datasets.

GLOBAL ECONOMIC DATA
